

03 · Service Catalog

Every entry carries a status marker. Definitions are in [04-CAPABILITY-REGISTER](#).

[LIVE] — in production today, demonstrable on request **[BUILD]** — designed, scoped, not yet built **[SPEC]** — specified only; no delivery date offered

Line 1 — Lead generation

Service	What it is	Status
Meta paid advertising	Full-funnel campaign build and management: prospecting, retargeting, geo tiering, restricted-category compliant	[LIVE]
Creative production line	Concept brief to finished asset — angles, hooks, reference library, finished stills and video, on brand	[LIVE]
Short-form / TikTok	Vertical hook-first cuts from tool demos and analysis	[BUILD]
Telegram growth	Channel build, automated posting, CTA rotation, engagement tracking	[LIVE]
Organic content engine	Long-form analysis repurposed into posts, carousels and PDFs	[LIVE]
Lead magnets	Trader-profiling quiz, foundation course and eBooks as front-end offers	[LIVE]
Creative refresh cadence	Fatigue monitoring and scheduled new angles	[LIVE]
Ad-account structure	Business Manager and account architecture for multi-tenant media buying in a restricted category	[BUILD]

Line 2 — Lead capture and tracking

Service	What it is	Status
Landing page library	Feature-specific pages, one per product angle	[LIVE]
Creative-ID convention	A tagging scheme tying a specific ad to a specific funded account	[LIVE]
Pixel and server-side events	Browser pixel live; server-side Conversions API to follow	[BUILD]
Signup to funded funnel	Verified signup, seven-day full-access trial, region-aware upgrade routing	[LIVE]
Lifecycle email	Automatic list segmentation by account status	[LIVE]
Link tracker	Short links with tracking	[LIVE]
Anti-abuse	Signup fingerprinting, IP capture, trial-farm detection	[LIVE]
Growth dashboard	Funnel metrics with a daily automated snapshot	[LIVE]
Per-IB attribution	Which trader belongs to which IB, and what they trade	[BUILD] — depends on Dupoin data, see 05

On attribution: MMFX already ingests Dupoin's referred-account export, parses it and matches trading account numbers to platform members. The parser, the account registry and the matching logic are live. What is missing is a sub-IB identifier and lots traded in the data itself. This is an extension of a working pipeline, not a new system.

Line 3 — Products

The fifteen items in 02-PRODUCT-BOUNDARY, licensed and re-branded into each tenant.

Service	Status
Ten TradingView indicators + two strategies, automated grant and revoke	[LIVE]
AI Trading Assistant (read-only live account analysis and coaching)	[LIVE]
Fundamental Desk research bot	[LIVE]
Know Your Style profiling quiz	[LIVE]
Economic calendar	[LIVE]
Market news and sentiment, nineteen instruments	[LIVE]
Member dashboard	[LIVE]
Short foundation course	[BUILD]
Upload-and-publish studio for the IB's own content	[BUILD]
White-label branding layer (theme, logo, domain, email sender)	[BUILD]
Per-tenant feature toggles	[BUILD]
MT5 expert advisor	[SPEC]

Line 4 — IB enablement and retention

The line that justifies an override rather than a fee.

Service	What it is	Status
The desk as the retention layer	Every tool above, working to keep the IB's traders funded and active	[LIVE]
IB onboarding kit	Pitch deck, swipe files, objection handling, compliance rules — so a new IB can start selling in a week	[BUILD]
Sub-IB portal	The IB's own view: their leads, their funnel, their volume, their payout	[BUILD]
Trader-survival reporting	Account survival and activity under the MIB, measured against Dupoin's baseline	[BUILD]
Compliance guardrails	One rule set enforced across every desk, with review and takedown	[BUILD]

The last two are the ones Dupoin should care about most. Survival reporting turns "our IBs produce more" from an assertion into a measured claim, and the guardrails mean thirty IBs operating under the MIB do not become thirty independent compliance risks.
