

04 • Creative Assets

Everything in this section is in the `assets/` folder of this pack, cleared for use in paid social.

1. What's included

`assets/ads/` — 9 existing ad creatives

Produced in-house, already on-brand. Use directly, or as the visual reference for new production.

File	Product	Format	Size
<code>AITA-I4-antecedent.png</code>	AI Trading Assistant	Static image	2400×3000 (4:5)
<code>AITA-I5-divergence.png</code>	AI Trading Assistant	Static image	2400×3000 (4:5)
<code>KYS-I1-fullbleed.png</code>	Know Your Style	Static image	1080×1350 (4:5)
<code>KYS-V1-cover.png</code>	Know Your Style	Video cover	834×1112
<code>KYS-V2-cover.png</code>	Know Your Style	Video cover	784×1176
<code>COURSE-V1-cover.png</code>	MM System course	Video cover	834×1112
<code>COURSE-V2-cover.png</code>	MM System course	Video cover	784×1176
<code>FUND-V1-cover.png</code>	Fundamental Desk	Video cover	834×1112
<code>FUND-V2-cover.png</code>	Fundamental Desk	Video cover	784×1176

The `-V*-cover` files are **cover frames for video concepts**. Ask Don for the video files themselves if you want to run them as-is.

`assets/screens/` — 22 in-app screenshots

Real product UI, ready to drop into creative. Two sets: tall app views (820×1618, ideal for 9:16 / 4:5 device mock-ups) and 558×1000 crops.

Product area	Files
AI Trading Assistant ★	<code>ai-trading-assistant.png</code> (full desk), <code>aita-performance.png</code> , <code>aita-radar.png</code> , <code>aita-coach.png</code> , <code>aita-breakdowns.png</code>
Daily Analysis	<code>daily-analysis.jpg</code> , <code>analysis.jpg</code>
Indicators / Strategies	<code>indicators.jpg</code> , <code>strategies.jpg</code> , <code>chart.jpg</code>
Signals	<code>signals.jpg</code>
Course	<code>academy.jpg</code> , <code>mm-system.jpg</code>
Library	<code>ebook-library.jpg</code> , <code>library.jpg</code>
Live Classes	<code>live-classes.jpg</code> , <code>live.jpg</code>
AI bots	<code>analysis-bots.jpg</code> , <code>analysis-bots-2.jpg</code> , <code>bots.jpg</code>
News / Calendar	<code>news.jpg</code> , <code>economic-calendar.jpg</code>

The five `ai-trading-assistant` / `aita-*` captures are the lead product and the priority for new creative: the full desk, the performance KPI grid, the trader radar, "Don's read" (the AI coach), and the by-symbol/session/weekday breakdowns.

⚠ **These are a real member account, so they show real P&L figures.** They may be used to show *what the product looks like* — they must **not** be presented as a performance claim, a typical result, or an implied return. If a figure would read as "this is what you'll make", crop or reframe it. See `05-COMPLIANCE.md` §2.

assets/higgsfield/ — 31 AI-generated product assets ★ NEW

Produced in Higgsfield Marketing Studio: **21 videos + 10 stills** of MM products (indicators on-device, the MM System kit, TradingView strategies, the mentorship kit). Mostly 3:4 and 9:16, 6–11s, 720p. Use as **hero product motion and B-roll** — they are brand-built product renders, not screen recordings.

Named `HF-{PRODUCT}-{V|I}{n}-{ratio}`, e.g. `HF-MM-INDICATORS-LAPTOP-V1-3x4.mp4`.

The 25 finished ad creatives — in Notion, not in this pack

`CREATIVE-REGISTER.csv` lists every finished, campaign-ready creative: **13 video concepts + 12 statics = 136 files**, each cut to 3 aspect ratios and (for video) 3 hook variants — e.g. `CRT-2621-CHARTREAD` ships as `CRT-2621-CHARTREAD-A1/B1/C1` × 9:16, 4:5, 1:1.

They live in the **Notion Creative Library**, which is the single source of truth: it carries the aspect ratios, the offer mapping, the linked brief and a **Ready for Campaign** flag per asset, and it stays current as new cuts land.

Ask Don for access to the Notion Creative Library rather than working from a

copied folder — the **Ready · by Offer** board view is the fastest way to see what's cleared to run. The **CRT-...** names map directly to the **cid** scheme in **03-LANDING-PAGES-AND-TRACKING.md**.

2. Naming convention — please continue it

{FEATURE}-{TYPE}-{n}-{descriptor}.{ext}

- **FEATURE:** **AITA** (AI Trading Assistant) · **KYS** · **COURSE** · **FUND** · **DAILY** · **IND** · **STRAT** · **SIGNALS** · **CLASSES** · **EBOOK** · **BOTS**
- **TYPE:** **I** = static image · **V** = video
- **n:** sequence number · **descriptor:** the hook in one word

Example: **AITA-I6-scorecard.png**

Keep the creative filename aligned with the **cid** in the ad URL (see **03-LANDING-PAGES-AND-TRACKING.md** §3) so a creative can be traced from file → ad → signup → funded member. E.g. file **AITA-I6-scorecard.png** → **cid=CRT-0917-AITA-SCORE-I6**.

3. Brand direction

Feel: warm-premium, calm, editorial. Closer to a fintech product page than a trading-guru ad.

Accent	Signal orange #ff5a1f — used sparingly, for emphasis only
Ink / text	Near-black warm #1a1714
Surfaces	Warm off-white #fbfaf8 , white cards, soft peach #ffece2
Type	Bricolage Grotesque (headlines) · Hanken Grotesk (body)
Imagery	Real product UI, charts, clean device mock-ups

Visual don'ts: ❌ cars/watches/cash/jets ❌ neon "trading room" clichés ❌ stock-photo men in suits pointing at screens ❌ green candle explosions ❌ cluttered, hype-heavy layouts

Look at **AITA-I4** / **AITA-I5** **first** — they're the clearest expression of where the brand is going.

4. Formats to produce

Placement	Ratio	Size
Feed (primary)	4:5	1080×1350
Stories / Reels	9:16	1080×1920
Square (fallback)	1:1	1080×1080

Prioritise **4:5 static** and **9:16 video**. Keep text clear of the outer ~14% top/bottom on 9:16 for UI safe zones.

5. Creative angles that fit the product

Each maps to a landing page — **match the ad promise to the LP**.

AI Trading Assistant → </lp/ai-trading-assistant>

1. *"You don't have a strategy problem. You have a nobody's-keeping-score problem."*
2. *"Your account already knows why you're losing."*
3. *"What's your actual win rate?"* — most can't answer
4. *"You'll never journal a trade again."*

Know Your Style → </lp/know-your-style>

1. *"Fourteen questions. Then you'll know why your style keeps failing."*
2. *"You're copying someone else's style — and blaming yourself."*

Daily Analysis → </lp/daily-analysis>

1. *"Every session, the gold read — before you risk a thing."*
2. Consistency as proof: a read published day after day

Course → </lp/mm-system>

1. *"19 lessons. Basic to institutional."* — for the overwhelmed beginner

⚠ Every one of these must still pass [05-COMPLIANCE.md](#). Note that none promise an outcome — they promise **clarity, diagnosis and a system**. Keep new angles in that register.

6. What we'd like produced

1. **AI Trading Assistant creative** — the priority. Static 4:5 + 9:16 video. Product screenshots are in [assets/screens/](#) ([ai-trading-assistant.png](#), [aita-*](#)).
2. **Know Your Style** — quiz-led, high-intent. Strong for cold traffic.
3. **Hook-testing batch** — several variants against the same LP so we can read hook performance cleanly via [cid](#).

Everything goes to Don for sign-off before it runs — copy and visual.
