

02 • Product Features

What a member actually gets. Each entry gives the **hook** and its **landing page**, so ad promise and LP always match.

Full detail: [MMFeatures.md](#) . Flagship deep-dive: [AI-TRADING-ASSISTANT.md](#) .

Every claim must still clear [05-COMPLIANCE.md](#) .

★ AI Trading Assistant — the flagship

LP: </lp/ai-trading-assistant> · *Members only · launched 14 Aug 2026*

Connects **read-only** to the trader's live MT4/MT5 account, imports every trade automatically (no manual logging), then shows:

- Real performance — win rate, profit factor, expectancy, drawdown, equity curve
- "Leaks" — the behaviours costing money (revenge trading, oversized losses,

overtrading), **in dollars**, tied to the exact trades

- A **discipline score** against rules the trader sets themselves
- "Don's read" — an AI coach reviewing their trades against their own goals

Hook: *"You don't have a strategy problem. You have a 'nobody's keeping score' problem."*

Trust line (use it early): read-only — it can never trade or withdraw, and the password is never stored.

Why it's the lead: no competitor in this space offers it, and it names the exact pain the audience feels — *"I don't know what I'm doing wrong."*

★ Know Your Style

LP: </lp/know-your-style>

A 14-question profiler that identifies the trader's archetype and emails a personalised result.

Hook: *"Fourteen questions. Then you'll know why your style keeps failing."*

Why it works in ads: interactive, self-revealing, fast, and shareable — the strongest top-of-funnel asset in the product. Low commitment, high intent.

| Daily Analysis

LP: </lp/daily-analysis>

Don's own top-down XAU/USD read, published as a running series (**59 editions published**). Each: a video walkthrough, a written PDF, the day's bias and session tag.

Hook: *"Every session, the gold read — before you risk a thing."* **Angle:** consistency *is* the proof — real work published day after day.

| The MM System (Course)

LP: </lp/mm-system>

The full curriculum — **19 lessons across 6 modules**, foundations through to the entry model and trade management. Streamed in-app with downloadable slide decks.

Hook: *"The exact system. Basic to institutional, in 19 lessons."* **Angle:** the answer to *"where do I even start?"* — beginner/overwhelmed avatar.

| Indicators — 10 proprietary TradingView tools

LP: </lp/indicators>

Ten invite-only TradingView indicators, **granted automatically** once the member submits their TradingView username: Squeeze Pulse, Wave Pressure, Structure Map, Echo Predictor, Trend Rail, Pivot Trend, MTF Minicharts, Auto Trendlines, Adaptive MA, Reversion Bands.

Hook: *"Drop your TradingView name. Ten indicators appear."* **Angle:** genuinely proprietary and unavailable elsewhere; the auto-grant demos beautifully. ⚠️ Analysis tools — they never "predict".

| Strategies

LP: </lp/strategies>

Two full TradingView **strategy** scripts (MM AMA SuperTrend, MM System 5m Entry), so members can backtest the method themselves. More in build.

Hook: *"Backtest the exact entry model — on your own charts."* ⚠️ **Never publish backtest returns.**

| Signals ⚠️

LP: </lp/signals>

The MMFX signals desk, delivered via Telegram.

Hook: *"A few gold calls a day. Entry, stop, target."* — the LP is worded as *"teaching examples, not blind calls"*; keep ad copy in that register.

⚠️ **Our most compliance-sensitive surface.** Never quote accuracy, win rate, pips or profit. Signals are trade *ideas to evaluate* — never advice, never an income promise. Clear any signals-led concept with Don first.

Fundamental Desk

LP: </lp/fundamental-desk>

An interactive bot giving the live macro picture driving XAU/USD, and emailing a PDF thesis.

Hook: *"Know which way gold is leaning before you take the trade."*

Analysis Bots (both AI tools together)

LP: </lp/analysis-bots> — *"Two bots: one reads the macro, one reads you."*

Live Classes

LP: </lp/live-classes>

Live on-the-charts sessions with the desk — outlook, trade reviews, open Q&A.

Hook: *"Twice a week, live on the charts, with the desk."* ⚠️ **Confirm the current schedule with Don before promoting cadence.**

The MM Library

LP: </lp/ebook-library>

Four member eBooks: *The MM System (eBook)*, *The Five-Stage Workflow*, *Decision Trees & Invalidation*, *Cheat Sheets & Quick Reference*.

Hook: *"The whole system, on paper. Four books you'll re-read."*

Also in the app (supporting, not usually ad-led)

- **Team MM** — private, invite-only Telegram desk for funded members. Invites

are issued by hand. *Aspiration/retention, not acquisition.*

- **News & Articles** — sentiment-tagged headlines across 19 instruments
- **Economic Calendar** — high-impact events, currency-filterable
- **Dashboard** — the member's home desk: live prices, today's brief, the

The bigger story

Individual features are the hooks; this is the frame they sit in:

Trading profitably isn't one skill — it's a loop:

Analysis → Execution → Trade Management, on a foundation of education.

Everything maps to a stage: Daily Analysis and the Fundamental Desk for **analysis**; indicators, strategies and signals for **execution**; the **AI Trading Assistant** for **trade management** — the stage almost every retail trader skips, and the reason most never improve.

That's the pitch: most educators sell information and disappear. MMFX gives the method *and* reads your actual results back to you.
